

SHIELDED VIRTUAL NETWORK + CLOUD CONNECTIVITY

Product Offer for Enterprises

Zayo provides a modern, secure, and affordable means for your locations to communicate, share data, access the Internet and connect to cloud services. Introducing our Shielded Virtual Network (SVN) – a dedicated, fast, protected, fiber-based private network solution. With SVN, you can seamlessly and securely:

- Communicate and share data among locations with your own private IP VPN.
- Access the Internet with low latency and dedicated bandwidth, from as many locations as you choose.
- Protect against cyber attacks with Zayo’s DDoS Protection, our advanced detection and mitigation technology.
- Add CloudLink, our private, direct connection to your Cloud Service Provider (CSP), that virtually eliminates egress fees.

This competitive package from Zayo takes care of your multi-site private networking, your Internet, your Internet security, and your direct connection to the cloud – all delivered on one multi-service port, with dedicated bandwidth up to 10G.

YOUR NETWORK SERVICES

Connect to Multiple Locations Privately on a Fiber-Based Network

- A simple IP VPN solution allows you to securely connect multiple locations.
- Predictable and low latency routes with leading service guarantees.
- Keep your most critical data safe from DDoS attacks by running it over our MPLS backbone.
- Your IP VPN traffic will always be prioritized over “best-effort” traffic.

Internet Access from a Tier-1 Network

- Committed throughput to the customer edge.
- Seamless Internet growth with immediate access to massive bandwidth.
- Dual-stack architecture supports IPv4 and IPv6 simultaneously.

Cloud-based Dynamic DDoS Protection

- Advanced monitoring, detection, and mitigation passes only clean traffic.
- Automated mitigation cleans traffic before you are aware of the attack.
- Easy to activate with no GRE tunnels, hardware, or special configuration.

Optional CloudLink Upgrade

- Direct, private, and secure connection from your location to any CSP.
- Enables highly available and physically diverse designs.
- Connect to AWS, Azure, GCP, Oracle, IBM, Salesforce, Alibaba, or any other CSP.
- Significantly reduce download charges.

OUR FIBER FUELS GLOBAL INNOVATION

SHIELDED VIRTUAL NETWORK + CLOUD CONNECTIVITY

Product Offer for Enterprises

IMPROVE YOUR NETWORK PERFORMANCE

Your Network will Perform Better with Zayo:

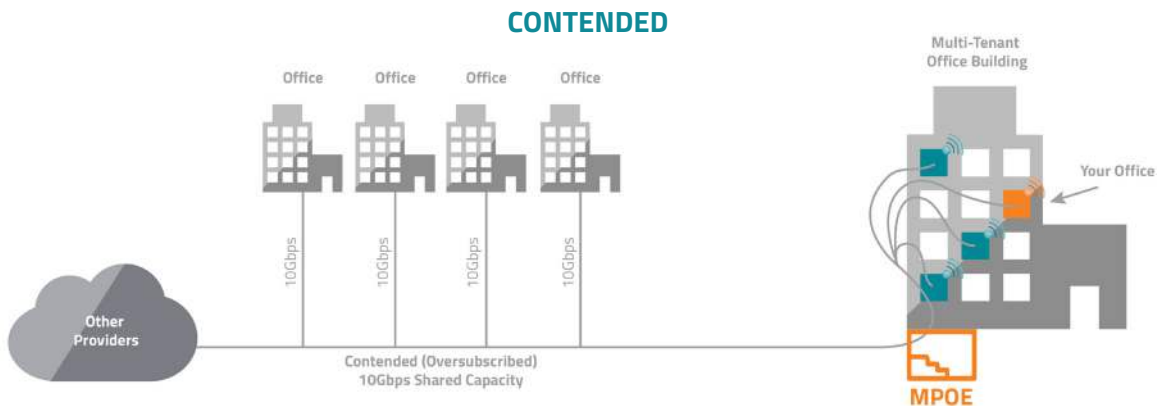

We provide you secure, dedicated, fiber-based network solutions:

- Uncapped, uncontended, symmetrical, dedicated bandwidth guarantees that the Internet is there when you and your customers need it
- Capacity up to 10Gbps leaves you room to grow
- Our resilient technology means your traffic gets through faster
- Our vast peering network means there isn't a corner of the globe we do not reach

And we protect your Internet traffic against cyber attacks with our network-based DDoS Protection Service. We stop most attacks before customers even know one is underway.

How others provide your Network

hint: it's oversubscribed over shared access

How Zayo provides your Network

hint: it's secure, uncapped, and uncontended over dedicated access

BENEFITS OF WORKING WITH ZAYO

Cost Effective:

- SVN can be 25% cheaper than services purchased separately.
- All SVN services are delivered using one port, saving money and increasing flexibility.
- Your bandwidth is there when you need it – our network is never oversubscribed.

Superior Performance and Security:

- Fiber-based virtual networking allows all of your locations to communicate privately and securely.
- Zayo provides the full line rate over a dedicated, symmetrical Internet access circuit.*
- Zayo’s network is diverse and intelligently designed – so when they go down, we stay up.
- DDoS Protection stops cyber attacks before your business is impacted – your mission critical bandwidth remains active at all times.

* Zayo allows customers to choose to oversubscribe at the port level

Fast & Reliable:

- Pricing is clear, quoting is quick, and delivery is fast and predictable.
- Experience amazing customer service provided by your local support team.
- Access 24/7/365 support and service from our Network Operations Center (NOC), and benefit from around-the-clock network management from our self-service customer portal, Tranzact.

Growth & Scalability:

- We’ve built a global fiber network with bandwidth up to 400G creating ample room for your growth.
- We are a Tier-1 ISP for the best Internet experience.
- We provide you access to a full suite of products to protect and support your network needs so you are able to grow your network as you grow your business.

ZAYO AT A GLANCE

Zayo is your networking partner. We provide mission-critical bandwidth to innovative and growing companies, over a massive global fiber network. In fact, the largest providers in the world buy their bandwidth from us. They rely on Zayo’s end-to-end high-performance fiber solutions and global reach to move, process, and store enormous volumes of data. **Now you can too.**
